## SECTION 1

INTRODUCTION**1.1 Description of University**

Founded in 1895, The University of Texas at Arlington is a Carnegie Research-1 “Very High Research Activity” institution with more than 100 years of academic excellence and tradition.

It is a comprehensive research, teaching, and public service university whose mission is the advancement of knowledge and the pursuit of excellence.

With a global enrollment of more than 60,000, UT Arlington is the largest university in North Texas. It also has one of the most diverse campus populations in the country. Students come from every state and more than 100 countries, contributing to *U.S. News & World Report* ranking it with the fifth-highest undergraduate ethnic diversity index in the country. UT Arlington is a Hispanic-Serving Institution and is ranked No. 1 in the U.S. for veterans and their families by *Military Times*.

The University has research centers in every discipline and state-of-the-art facilities in Arlington and Fort Worth that enable our faculty and students to help solve the world’s most urgent challenges. Of its 220,000-plus alumni, approximately 65% percent live in North Texas. Their presence helps the University create an annual economic impact of almost \$17.1 billion in the region.

**1.2 Background and Special Circumstances**

The current process of using software to manage updating and publishing the University academic catalog, managing the program changes and managing the curriculum course changes are a significant improvement over the time-consuming and unstable process that UT Arlington endured prior to having a commercial product. The previous in-house product had the potential for several errors to occur as large quantities of detailed information needed to be updated. UT Arlington would like to continue and even improve the progress made by having a commercial product to update, manage, and publish its academic catalog and curriculum.

**Procurement Process**

The University is issuing this RFP as a dual phase solicitation as described below.

**Phase One:**

Vendors will be invited to submit proposals in response to Phase One of this RFP. Proposals should focus on products and services that best satisfy UTA’s needs and must at a minimum meet the requirements provided in this RFP.

No cost information is desired from vendors in Phase One of the procurement process.

UTA’s Evaluation Team will evaluate vendors’ written responses with respect to UTA’s needs and requirements, as presented in this RFP. The most qualified vendors, as determined by the University’s evaluation team and established criteria, will be invited to continue with Phase Two of the procurement process.

**Phase Two:**

Vendors selected for Phase Two will be asked to perform demonstrations of their product and services. Such demonstrations will be based upon UTA’s specific functional needs and requirements outlined in the Scope of Work.

After a thorough evaluation of vendors’ statement of qualifications and demonstrations, UTA will solicit proposed

**\*1111557-27-3-49\***

pricing from qualified vendors. Furthermore, UTA may ask qualified vendors to refine their proposals for various products and services. At the conclusion of the process, the Evaluation Team will make a final recommendation of award.

NOTE: The University reserves the right to make a dual award if deemed to be in the best interest of, and the best value for, our needs.

### 1.3 Objective of Request for Proposal

The University of Texas at Arlington (**University**) is soliciting proposals from qualified vendors to perform work (**Work**) more specifically described in **Scope of Work** Document of this Request for Proposal (**RFP**).

### 1.4 Term of the Agreement

The initial term of the resulting Agreement will be for THREE (3) year(s) and thereafter the University shall have the right, at its option, to renew the Agreement for up to THREE (3) additional renewal terms of TWO (2) year(s) each.

Prices for the initial term are to be firm. At the end of the initial term and each renewal term (if any), the rates may be increased, decreased or remain unchanged. Any price adjustment must be requested by the Vendor in writing, including detailed documentation supporting the increase, at least sixty (60) days prior to the expiration of the current term. Changes, if agreed to, shall be based upon the percentage change in the Bureau of Labor Statistics' Consumer Price Index (CPI)-All Urban Consumers for Dallas-Fort Worth-Arlington for the previous contract period ([https://www.bls.gov/regions/southwest/news-release/consumerpriceindex\\_dallasfortworth.htm](https://www.bls.gov/regions/southwest/news-release/consumerpriceindex_dallasfortworth.htm)). No change in pricing shall exceed the year-over-year percentage change in the CPI index noted above, unless it is deemed in the best interest of the University based on current market conditions and the best value criteria included in Texas Education Code 51.9335.

### 1.5 Transition Period

Contractor must agree that when the resulting Contract Agreement of this RFP expires or is terminated for any reason, then, at the University's option, Contractor will continue to perform the Catalog & Curriculum Management System Services in accordance with the terms, conditions and pricing of this Contract Agreement until the University contracts with another qualified and experienced Contractor(s) to perform the Catalog & Curriculum Management System Services or, is able to perform the Catalog & Curriculum Management System Services in-house; provided that the Contractor will not be required to continue performing the Catalog & Curriculum Management System Services for more than 180 days after the expiration or termination date of this Contract Agreement.

The Contractor will cooperate with, and assist, the University's efforts to transition to another Contractor(s) or to perform Catalog & Curriculum Management System Services in-house.

### 1.6 Group Purchase Authority

Texas law authorizes institutions of higher education (defined by [§61.003, Education Code](#)) to use the group purchasing procurement method (ref. §§[51.9335](#), [73.115](#), and [74.008](#), *Education Code*). Additional Texas institutions of higher education may therefore elect to enter into a contract with the successful Proposer under this RFP. In particular, Proposer should note that University is part of The University of Texas System (**UT System**), which is comprised of fourteen institutions described at <http://www.utsystem.edu/institutions>. UT System institutions routinely evaluate whether a contract resulting from a procurement conducted by one of the institutions might be suitable for use by another, and if so, this RFP could give rise to additional purchase volumes. As a result, in submitting its proposal, Proposer should consider proposing a pricing model and other commercial terms that take into account the higher volumes and other expanded opportunities that could result from the eventual inclusion of other institutions in the purchase contemplated by this RFP. Any purchases made by other institutions based on this RFP will be the sole responsibility of those institutions.

## 1.7 Addenda and Additional RFP Documents

Any addenda or other subsequently released RFP documents will be posted to the University's online solicitation website [www.bidnetdirect.com//arlington](http://www.bidnetdirect.com//arlington) (BidNet). They will not be sent directly to potential proposers. It is the Proposer's responsibility to periodically check the BidNet website [www.bidnetdirect.com//arlington](http://www.bidnetdirect.com//arlington) for additional RFP documents.

## 1.8 Parking

Employees of companies who park their personal vehicle in UTA parking facilities, or any property owned or controlled by UTA, to perform their duties are required to purchase a faculty/staff or daily permit. For more information visit the University's Parking and Transportation Services website at <https://www.uta.edu/pats/parking/visitor-parking.php>.

## 2.5 Historically Underutilized Businesses

- 2.5.1 All agencies of the State of Texas are required to make a good faith effort to assist historically underutilized businesses (**HUBs**) in receiving contract awards. The goal of the HUB program is to promote full and equal business opportunity for all businesses in contracting with state agencies. Pursuant to the HUB program, if under the terms of any agreement or contractual arrangement resulting from this RFP, Contractor subcontracts any Work, then Contractor must make a good faith effort to utilize HUBs certified by the Procurement and Support Services Division of the Texas Comptroller of Public Accounts. Proposals that fail to comply with the requirements contained in this **Section 2.5** will constitute a material failure to comply with advertised specifications and will be rejected by University as non-responsive. Additionally, compliance with good faith effort guidelines is a condition precedent to awarding any agreement or contractual arrangement resulting from this RFP. Proposer acknowledges that, if selected by University, its obligation to make a good faith effort to utilize HUBs when subcontracting any Work will continue throughout the term of all agreements and contractual arrangements resulting from this RFP. Furthermore, any subcontracting of Work by the Proposer is subject to review by University to ensure compliance with the HUB program.

- 2.5.3 A HUB Subcontracting Plan (**HSP**) is a required part of the proposal. The HSP will be developed and administered in accordance with University's Policy on Utilization of Historically Underutilized Businesses, attached as **APPENDIX THREE**.

*Each Proposer must complete and return the HSP in accordance with the terms and conditions of this RFP, including **APPENDIX THREE**. Proposers that fail to submit the HSP will be considered non-responsive to this RFP as required by [§2161.252, Government Code](#).*

- 2.5.4 Proposer must submit all required proposal documents per the instructions provided in the proposal package.

Any proposal submitted in response to this RFP that is not accompanied by all required documents may be rejected by University as non-responsive due to material failure to comply with advertised specifications.

University will review Proposer's HSP prior to opening the proposal to confirm Proposer submitted the HSP. Proposer's failure to submit the HSP will result in University's rejection of the proposal as non-responsive due to material failure to comply with advertised specifications.

- 2.5.5 University may offer Proposer an opportunity to seek informal review of its draft HSP by University's HUB Office before the Submittal Deadline. If University extends this offer, details will be provided at the Pre-Proposal Conference (ref. **Section 2.6**) or by other means. Informal review is designed to help address questions Proposer may have about how to complete its HSP properly. Concurrence or comment on Proposer's draft HSP by University will *not* constitute formal approval of the HSP, and will *not* eliminate the need for Proposer to submit its final HSP to University as instructed by **Section 2.5**.

**\*1111557-27-14-49\***

## 5.4 Scope of Work

The University's expectations are that the information outlined in this Scope of Work be the minimal level of services provided. Vendors are encouraged to propose services that would provide enhancement to our service needs. Vendors should include details of any additional services available through their product and demonstrate how the services will meet or exceed UTA's expectations.

Contractor will provide the following services to University:

### Background

The University of Texas at Arlington adopted the use of commercial software to manage updating and publishing the University academic catalog, managing the program changes and managing the curriculum course changes in an effort to significantly improve efficiency, stability, and the ability to manage a large volume of detailed data within associated processes. UTA aims to continue and improve the progress made by having a commercial product to update, manage, and publish its academic catalog and curriculum.

### Objectives

The objective of this project is to continue the upward trajectory gained with having commercially hosted software products that significantly improve curriculum and academic catalog management functions for compliance, efficiency and accuracy. Specifically, the process of authoring, editing, updating, tracking, managing, and publishing the academic catalog; and to improve the accuracy and quality of the resulting catalog, including the systematic management of the curriculum course and program change processes.

### Roles & Responsibilities

The commercial vendor has the following responsibilities:

- Managing the Project timeline from external perspective.
- Jointly discussing the technical requirements with UTA.
- Integrating the product with UTA's student information system (SIS) which is currently Oracle's PeopleSoft v. 9.2 with PUM 26, and with PeopleTools 8.59.06 from a technical perspective.
- Customizing the vendor's product to UTA's Catalog Design, including creating output formats and rules, creating of custom data entry forms, and supporting on-screen presentation of structured information.
- Developing a working Test Environment version of the catalog.
- Jointly evaluating the Test Environment with UTA and modifying accordingly.
- Providing training to UTA's administrators and end-users on how to use the software.
- Customizing the vendor's software product to the publication format provided by UTA.
- Migrating existing catalog content to the vendor's product.
- Developing the final working version of the software to allow UTA to fully manage its catalog and curriculum management processes.

**\*1111557-27-15-49\***

UTA has the following responsibilities:

- Designate and task an internal project manager or team leader to interface with vendor personnel and coordinate UTA's execution of its responsibilities in launching the solution and provide adequate internal resources to assure timely deployment.
- Managing the project timeline from an internal perspective.
- Jointly discussing the Technical Intake with the vendor.
- Providing guidance and instruction on integrating vendor's software from a technical perspective.
- Complete final leg of integration from vendor to UTA's SIS (Office of Information Technology personnel).
- Managing the technical track including configuring the local software components necessary for interaction and integration with the hosted vendor's application which includes the data synchronization with the student information system (OIT personnel), and any desired data bridge to update the SIS directly.
- Establishing an initial level of data structure, as well as authoring policies and workflow configuration (OIT and Registrar personnel).
- Defining UTA's online Catalog Design, to allow vendor to match vendor's output to meet the criteria (Office of the Registrar).
- Providing feedback on catalog and curriculum management system content transition into vendor's software (Office of the Registrar).
- Jointly evaluate the Test Environment with the vendor and providing input to course correct.
- Ensuring key administrators and end-users attend training (Office of the Registrar).

### **Scope of Vendor Software Capabilities**

In addition to meeting the functionality and formal requirements mentioned below, all vendor submittals should be capable of meeting the needs of UTA as technology resources and tools evolve during the term of a resulting contract.

### **Catalog Authoring**

The Software will provide easy-to-use tools for departmental authors to modify the content in the existing catalog, and/or to create new content within that catalog. Authors will be shown content in one (1) of the web versions as the authors make changes via a WYSIWYG editor ("what-you-see-is-what-you-get").

The Software will provide templates for layout and styles so content created/modified by authors will be automatically consistent with the UTA's look and feel without additional modification.

The Software will allow for authoring constraints to be placed on the system, so that UTA styles and guidelines are enforced. Simple, rule-based corrections to content are applied automatically by the Software without manual intervention.

Authors can select from multiple styles and choose from a pre-defined list of formatting options when creating tables of courses and have the option to automatically calculate and display the total semester hours of courses listed within the table.

Authors can generate course catalog links that integrate with UTA's course catalog database. Any desired modifications to these auto-generated links require a template or configuration change and a site wide republish. Editing Software is easy to use with minimal training and is accessible within current versions of standard web browsers such as Internet Explorer and Firefox. End Users are not required to download or install any additional software to edit content.

At any time, authenticated users will be able to see the editing status of content within the system. Product should provide a report notifying editors of broken web links found throughout the catalog.

### **Image Library**

The Software will provide an image library and give administrators control over what images can be placed in it, how those images can be used, and visibility into where and how often the images are used.

The Software resizes images appropriately for each type of output format without user intervention and allows the image editor to be able to organize and catalog images for easy selection by authors.

Reports will be available to allow the image editors to see how the images are being used on the site. If a popular image is being used too heavily, the image editor can prevent new uses of the image while allowing existing use of the image to continue.

### **Course Integration**

Authors will be able to select from a complete course inventory of classes when creating and editing web pages in the catalog (e.g., to designate which classes from a list are required to graduate). Selected lists of classes will then be displayed in an auto-generated table in the catalog page.

The Software can support the ability to perform data consistency checks on authored content and will "flag" information that does not match (e.g., if courses are referenced that are not active, if active courses are not referenced, if authored content differs from database content, etc.).

Product should have a PeopleSoft Transfer Package (bridge) that completes the integration between the software and PeopleSoft SIS. Should include a web service element to pull information for added, changed and deactivated courses and a Procedural Language/Structured Query Language (PLSql) package that is installed in PeopleSoft SIS to update PeopleSoft SIS tables according to business rules.

Product should have administrative tools that allow administrative users full control of the site, including editing site navigation. Administrative tools should also include the ability to import all updated courses, in batch, from the SIS.

### **Workflow for Catalog and Curriculum (Course and Program) Management**

End Users are notified of their responsibility to participate in workflow via email. Each end user has a web page that displays a list of all content changes awaiting their approval. This web page can be bookmarked and is specific to each user.

The Software supports maintaining roles externally using Single Sign On (SSO) and user provisioning via Lightweight Directory Access Protocol (LDAP) or Active Directory; where external roles are not available; the

Software provides role maintenance screens where administrators may update which users are involved in each role. Where permitted, users should be allowed to self-delegate by identifying another End User who is able to act on his or her behalf.

Curriculum management allows for predefined and agile workflows, as well as the ability to develop new workflows as needed. Workflow actions are logged, easily viewed, and will note both the identity of the End User performing an action and the role under which that user was performing an action.

Rejections to workflow can include an explanation as to why content was rejected and may be pushed back to any previous workflow steps. End Users associated with that step's role will then be notified of the rejection and the optional explanation.

The Software supports grouping together sets of content for the purposes of workflow, so that all changes to the entire set are reviewed at once instead of piece-by-piece.

Once a curriculum cycle is completed, administrators can push pending curriculum items to the next catalog cycle and disable workflow for the published edition.

Curriculum (Course and Program) software supports university- developed forms to add, modify, and delete courses and programs; propose administrative changes. Software should be able to seamlessly integrate with catalog content (push and pull) and UTA website (push and pull). Forms should be able to be edited by administrators in real time to add/delete fields as needed within the curriculum cycle. All university personnel should be able to access/view proposals in progress.

### **Support**

The Product service refresh is expected to be available for the term of the contract and may be done annually if requested. Automatic, on-going maintenance is expected throughout the term when updates are released unless it requires UTA's involvement to coordinate the process.

### **Training**

Initial training is expected from the vendor when product is installed and should include all End Users. Initial training should be in-person on the UTA campus. Training manuals are expected to be available for initial training, as well access to on-going training materials and resources. Future training options may be requested by UTA as needed.

### **Reports**

The Software should support the ability to export reports of any kind regarding workflow, courses and/or programs, submissions, etc. with canned and/or ad hoc customizable reports generated by the End User.

### **Revision History**

The Software tracks changes made to content within the System both within an approval catalog and curriculum cycle and between approved versions. Each set of changes performed by a single End User is tracked. During content review, the End Users select between viewing the proposed content, all differences between the last approved content and the proposed content, or viewing specific changes made by a selected end User. Catalog and Curriculum Management administrators are also able to view changes between any two versions of approved content.

Changes to content are shown visually to the End User, for example, deletions are in red strikethrough and additions are in bold green. Hard copies of these views may be printed.

## Output Generation

The Software can generate multiple types of output, including a web version, a print-ready PDF version, a standalone HTML version suitable for inclusion on a CD-ROM, and an XML version for high-quality printing.

Output formats can be generated automatically from approved content without requiring manual intervention.

HTML content will include an automatically generated table of contents, utilize UTA's style and publication formatting guidelines, and provide easy search capabilities. The HTML content supports templates that include scripting functionality, such as .NET, JSP, or PHP, without additional configuration or changes.

PDF content includes the ability to specify multiple columns and running page headers with an automatically generated table of contents. The generated output supports proper hyphenation and fully justified text and has widow and orphan control. Different PDF formats can be used for different publications.

## Technical Requirements

The Software can use existing campus authentication systems, which can prevent the need for new login names and passwords.

The solution shall be run as a hosted solution on vendor's managed servers (or their designated third party's), or as a hybrid solution where the changes are performed on a hosted basis but the approved catalog is published on UTA's website. The solution runs under both Windows and Linux.

The Software does not restrict the number of End Users who may have accounts on the System or who may simultaneously access the System. The Software can support the load of hundreds of End Users, including the load of many users performing work at the same time during training and throughout the curriculum cycle.

The Software can co-exist with standard frameworks installed on the same server, such as .NET, J2EE, and LAMP environments.

The vendor must provide email and phone support in addition to a trouble ticket system.

System must be secure and meet all local, state, and federal data security standards.

Vendor's software solution for curriculum course management must integrate with PeopleSoft SIS. Administrative tools should also include the ability to import all updated courses, in batch, from the SIS.

## Deliverable

The deliverable is a fully functioning implementation of vendor's software. End users can now author and edit the catalog and perform course changes, administrators have the capability to fully manage workflow, and content can be output to the web and print formats. UTA can and will completely manage their catalog using the vendor's software. Office of the Registrar approves the completion of this step.

## Work Approach

Vendor works closely with UTA in a detailed approach to provide high quality work in a timely manner. Accordingly, UTA's designated Project Manager will have the requisite technical expertise, content awareness, and operational authority on behalf of UTA to deploy the solution on the schedule mutually agreed to.

The Project plan and sub-steps are developed based on the UTA's completed Project Charter.

The Technical Environment will be in the vendor's Software, which will use content from the UTA's SIS. This allows the Software to collect the relevant data to allow updates to the catalog.

### **Schedule & Milestones**

Vendor conducts extensive discussions with the Office of the Registrar and key technical staff at the beginning of the Project to determine the key technical and procedural requirements. UTA's responses will determine the specific steps at a granular level, and the timing for the milestones. Vendor and UTA will jointly agree on the timing.

The vendor must implement software upgrades and updates to the system; however, allowing the University to implement these upgrades on its own timetable.

### **Completion Criteria and Final Acceptance**

- 1) Kickoff and Technical Intake Meetings – the questionnaire is completed and agreed upon.
- 2) Catalog Design – how the catalog data within the software will be expressed in its output format has been defined and agreed upon.
- 3) Consulting (Pilot) Session – the points discussed are agreed upon.
- 4) Catalog Content Migration – existing catalog data is now housed in software.
- 5) Catalog Test Environment launch – Test Environment users in Office of the Registrar can make modifications to the test department's catalog content.
- 6) Catalog Training – UTA's users have attended training and received documentation on using the Software.
- 7) Course Management System Training – UTA's users have attended training and received documentation on using the Software.
- 8) Program Management System Training – UTA's users have attended training and received documentation on using the Software
- 9) Publication formats – the format of the print output that the catalog will generate has been defined and agreed upon.
- 10) Catalog and Course and Program Management System Releases – Software is fully functional, and the process is decentralized to the departmental authors to own and manage portions the catalog by established ownership and workflows.

The Registrar's Office provides final approval.

### **Optional Services**

Vendor services that are available, but not specifically requested in this Scope of Work should be included and clearly described in the vendor response under a section titled Optional Services. The University will reserve the right to obtain these services as needed, based on availability of funding, and if in the best interest of the University.

## SECTION 1

GENERAL INFORMATION**1.1 Purpose**

University is soliciting competitive sealed proposals from Proposers having suitable qualifications and experience providing services in accordance with the terms, conditions and requirements set forth in this RFP. This RFP provides sufficient information for interested parties to prepare and submit proposals for consideration by University.

By submitting a proposal, Proposer certifies that it understands this RFP and has full knowledge of the scope, nature, quality, and quantity of services to be performed, the detailed requirements of services to be provided, and the conditions under which services are to be performed. Proposer also certifies that it understands that all costs relating to preparing a response to this RFP will be the sole responsibility of the Proposer.

PROPOSER IS CAUTIONED TO READ THE INFORMATION CONTAINED IN THIS RFP CAREFULLY AND TO SUBMIT A COMPLETE RESPONSE TO ALL REQUIREMENTS AND QUESTIONS AS DIRECTED.

**1.2 Inquiries and Interpretations**

University may in its sole discretion respond in writing to written inquiries concerning this RFP and mail its response as an Addendum to all parties recorded by University as having received a copy of this RFP. Only University's responses that are made by formal written Addenda will be binding on University. Any verbal responses, written interpretations or clarifications other than Addenda to this RFP will be without legal effect. All Addenda issued by University prior to the Submittal Deadline will be and are hereby incorporated as a part of this RFP for all purposes.

Proposers are required to acknowledge receipt of each Addendum as specified in this Section. The Proposer must acknowledge all Addenda by completing, signing and returning the Addenda Checklist (ref. **Section 4 of APPENDIX ONE**). The Addenda Checklist must be received by University prior to the Submittal Deadline and should accompany the Proposer's proposal.

Any interested party that receives this RFP by means other than directly from University is responsible for notifying University that it has received an RFP package, and should provide its name, address, telephone and facsimile (**FAX**) numbers, and email address, to University, so that if University issues Addenda to this RFP or provides written answers to questions, that information can be provided to that party.

**1.3 Public Information**

Proposer is hereby notified that University strictly adheres to all statutes, court decisions and the opinions of the Texas Attorney General with respect to disclosure of public information.

University may seek to protect from disclosure all information submitted in response to this RFP until such time as a final agreement is executed.

Upon execution of a final agreement, University will consider all information, documentation, and other materials requested to be submitted in response to this RFP, to be of a non-confidential and non-proprietary nature and, therefore, subject to public disclosure under the *Texas Public Information Act* (ref. [Chapter 552, Government Code](#)). Proposer will be advised of a request for public information that implicates their materials and will have the opportunity to raise any objections to disclosure to the Texas Attorney General. Certain information may be protected from release under §§[552.101](#), [552.104](#), [552.110](#), [552.113](#), and [552.131](#), *Government Code*.

**1.4 Type of Agreement**

Contractor, if any, will be required to enter into a contract with University in a form that (i) includes terms and conditions substantially similar to the terms and conditions set forth in **APPENDIX TWO**, and (ii) is otherwise acceptable to University in all respects (**Agreement**).

**1.5 Proposal Evaluation Process**

University will select Contractor by using the competitive sealed proposal process described in this Section. Any proposals that are not submitted by the Submittal Deadline or that are not accompanied by required number of completed and signed originals of the HSP will be rejected by University as non-responsive due to material failure to comply with this RFP (ref. **Section 2.5.4**). Upon completion of the initial review and evaluation of proposals, University may invite one or more selected Proposers to participate in oral presentations. University will use commercially reasonable efforts to avoid public disclosure of the contents of a proposal prior to selection of Contractor.

University may make the selection of Contractor on the basis of the proposals initially submitted, without discussion, clarification or modification. In the alternative, University may make the selection of Contractor on the basis of negotiation with any of the Proposers. In conducting negotiations, University will use commercially reasonable efforts to avoid disclosing the contents of competing proposals.

University may discuss and negotiate all elements of proposals submitted by Proposers within a specified competitive range. For purposes of negotiation, University may establish, after an initial review of the proposals, a competitive range of acceptable or potentially acceptable proposals composed of the highest rated proposal(s). In that event, University may defer further action on proposals not included within the

**\*1111557-27-24-49\***

competitive range pending the selection of Contractor; provided, however, University reserves the right to include additional proposals in the competitive range if deemed to be in the best interest of University.

After the Submittal Deadline but before final selection of Contractor, University may permit Proposer to revise its proposal in order to obtain the Proposer's best and final offer. In that event, representations made by Proposer in its revised proposal, including price and fee quotes, will be binding on Proposer. University will provide each Proposer within the competitive range with an equal opportunity for discussion and revision of its proposal. University is not obligated to select the Proposer offering the most attractive economic terms if that Proposer is not the most advantageous to University overall, as determined by University.

University reserves the right to (a) enter into an agreement for all or any portion of the requirements and specifications set forth in this RFP with one or more Proposers, (b) reject any and all proposals and re-solicit proposals, or (c) reject any and all proposals and temporarily or permanently abandon this selection process, if deemed to be in the best interests of University. University reserves the right to accept or reject any or all proposals, waive any formalities, procedural requirements, or minor technical inconsistencies, and delete any requirement or specification from this RFP or the Agreement when deemed to be in University's best interest. University reserves the right to seek clarification from any Proposer concerning any item contained in its proposal prior to final selection. Such clarification may be provided by telephone conference or personal meeting with or writing to University, at University's sole discretion. *Complete the following additional questions if Information Resources will be hosted by Proposer:*

2. How does data flow between University and Information Resources? If connecting via a private circuit, describe what security features are incorporated into the private circuit. If connecting via a public network (e.g., the Internet), describe the way Proposer will safeguard University Records.

3. Do Information Resources secure data transmission between University and Proposer? If yes, describe how Proposer provides that security. If no, what alternative safeguards are used to protect University Records in transit?

#### **Notification of Security Incidents**

*Complete the following additional questions if Information Resources will be hosted by Proposer:*

1. Describe Proposer's procedures to isolate or disable all systems that interact with Information Resources in the event a security breach is identified, including any systems that would hold or process University Records, or from which University Records may be accessed.

2. What procedures, methodology, and timetables does Proposer have in place to detect information security breaches and notify University and other customers? Include Proposer's definition of security breach.

3. Describe the procedures and methodology Proposer has in place to detect information security breaches, including unauthorized access by Proposer's and subcontractor's own employees and agents and provide required notifications in a manner that meets the requirements of the state breach notification law.

#### **Compliance with Applicable Legal & Regulatory Requirements**

*Complete the following additional questions if Information Resources will be hosted by Proposer:*

1. Describe the procedures and methodology Proposer has in place to retain, preserve, backup, delete, and search data in a manner that meets the requirements of state and federal electronic discovery rules, including how and in what format University Records are kept and what tools are available to University to access University Records.

2. Describe the safeguards Proposer has in place to ensure that systems (including any systems that would hold or process University Records, or from which University Records may be accessed) that interact with Information Resources reside within the United States of America. If no such controls, describe Proposer's processes for ensuring that data is protected in compliance with all applicable US federal and state requirements, including export control.

3. List and describe any regulatory or legal actions taken against Proposer for security or privacy violations or security breaches or incidents, including the final outcome.

  - 2.1 **Prohibition on Unauthorized Use or Disclosure of FERPA Records.** Contractor will hold University FERPA Records in strict confidence.
