This text was developed to help you develop these skills.</p>   |

| 4 |  | <p>Virginia Tech Libraries and the Pamplin College of Business are pleased to announce publication of <a href="#">Fundamentals of Business</a>, a full color, 440+ page free online textbook for Virginia Tech’s Foundations of Business course. This Virginia Tech course averages 14 sections with over 700 students in Fall semesters. The textbook is an open educational resource, and may be customized and redistributed non-commercially with attribution.</p>  |
| 5 |  | <p><a href="#">Principles of Macroeconomics</a> covers the scope and sequence for a one-semester economics course. The text also includes many current examples, including: the housing bubble and housing crisis, Zimbabwe’s hyperinflation, global unemployment, and the appointment of the United States’ first female Federal Reserve chair, Janet Yellen. The pedagogical choices, chapter arrangements, and learning objective fulfillment were developed and vetted with feedback from educators dedicated to the project. The outcome is a balanced approach to economics, to both Keynesian and classical views, and to the theory and application of economics concepts. Current events are treated in a politically-balanced way, as well.</p> |
